**DETAILED ACTION**

1. As per the instant Application having Application number 10/658,273 the examiner acknowledges the applicant's submission of the amendment dated 12/10/2009.

***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission of claim amendments filed on 12/10/2009 has been entered.

**EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

4. Authorization for this examiner's amendment was given telephone call on 1/14/2010, following up a telephone interview with Andrew Harry (Reg. No. 56,959) on 1/11/2010 and 1/12/2010.

5. The application has been amended as follows:

6. **Claim 14 (Currently Amended)**

An image forming apparatus, comprising:

    a display device;

Art Unit: 2185

a plurality of hardware resources configured to carry out image formation;  
a plurality of application programs performing respective processing of the plurality of application programs related to the image formation;  
a storage device storing rewritable shared data which is used by the plurality of application programs in common; and  
a shared-data control unit selecting one or more of the plurality of application programs as destinations of updating-start notification and notifying a start of updating of the shared data to the selected one or more application programs when acquisition and updating of the shared data is inhibited in response to a write-lock request received from one of the plurality of application programs, and the shared-data control unit notifying an end of the updating of the shared data to the selected application programs when the acquisition and updating of the shared data is allowed in response to an unlock request received from said one of the plurality of application programs, wherein

the plurality of application programs include a first application program that is currently subject to updating of the shared data by the shared-data control unit and configured to display the shared data on the display device, a second application program that is not currently subject to updating of the shared data by the shared-data control unit and configured to display the shared data on the display device when acquisition of the shared data is not inhibited, and a third application program that is configured to not display the shared data on the display device,

when updating of the shared data of the first application program is performed by the shared data control unit, an updating-start notification is sent to the second application

program by the shared data control unit and no updating-start notification is sent to the third application program by the shared data control unit, and

one of a screen of the shared data of the first application program and a screen of the shared data of the second application program is selectively displayed on the display device.

#### **REASONS FOR ALLOWANCE**

7. Per the instant office action, claims **14, 16-21 and 25-27** are considered as allowable subject matter.

The reasons for allowance of claim **14** are that the prior art of record neither anticipates, nor renders obvious the recited combination as a whole; including the limitations of an image forming apparatus comprising code "...a shared-data control unit selecting one or more of the plurality of application program as destinations of updating-start notification and notifying a start of updating of the shared data to the selected one or more application programs when acquisition and updating of the shared data is inhibited in response to a write-lock request received from one of the plurality of application programs, and the shared-data control unit notifying an end of the updating of the shared data to the selected application programs when the acquisition and updating of the shared data is allowed in response to an unlock request received from said one of the plurality of application programs, wherein the plurality of application programs include a first application program that is currently subject to updating of the shared data by the shared-data control unit and configured to display the shared data on the display device, a second application program that is not currently subject to updating of the shared data by the

Art Unit: 2185

shared-data control unit and configured to display the shared data on the display device when acquisition of the shared data is not inhibited, and a third application program that is configured to not display the shared data on the display device, when updating of the shared data of the first application program is performed by the shared data control unit, an updating-start notification is sent to the second application program by the shared data control unit and no updating-start notification is sent to the third application program by the shared data control unit, and one of a screen of the shared data of the first application program and a screen of the shared data of the second application program is selectively displayed on the display device.”

8. Dependent claims 16-21 and 25-27 are allowable at least for the reasons recited above including all the limitations of the allowable independent base claim upon which they depend.

9. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
